Education

Carnegie Mellon University	Master of Information Systems Management Areas of Focus: Machine Learning, Computer Science, Business GPA: 3.67/4.0	Aug 2019 – Dec 2020 Pittsburgh, PA
Relevant Coursework:	Intro to Deep Learning (TA, A+), Reinforcement Learning, (Non)-Convex Optimization (A-), Computational Neuroscience (A+), Distributed Systems, R&D Management, Finance, Agile	
Washington University in St. Louis	B.A. Marketing, Chinese Minor in Computer Science GPA: 3.5/4.0	Aug 2014 – Dec 2018 St. Louis, MO
Relevant Coursework:	Intro. to Machine Learning, Cloud Computing for ML, Data Structures and Algorithms, Linear Algebra, Statistics II	

Professional Experience

Carnegie Mellon University	Teaching Assistant (11-785 Intro to Deep Learning) - Wrote 4 homework assignments based on the math and programming of deep learning libraries like PyTorch - Delivered two recitation lectures on Matrix Calculus and Backprop, also holding office hours and answering online questions - Answered 3400+ student questions on online platform Piazza	Jun 2020 – Dec 2020 Pittsburgh, PA
Bosch Security Systems	Data Mining Intern - ML engineering for Bosch's Cloud Services R&D division - Built system that tracks and evaluates Social Distancing for retail stores. Based on Computer Vision positioning of customers - Researched, selected, and implemented state-of-the-art trajectory compression algorithm. Projected to reduce data volume by 15x - Validated own results based on baseline algorithms, academic papers, and competitor products	Summer 2020 Pittsburgh, PA
John Deere	Product Planning Intern - Business analytics using R, SQL, and VBA	Summer 2017 Waterloo, IA
Washington University in St. Louis	Research Assistant - Performed text web scraping and data analysis tasks with R	Aug 2016 – May 2017 St. Louis, MO

Selected Project

Automatic Speech Transcription with Deep Learning	Tools: Python, Torch, Amazon Web Services (AWS), Jupyter Notebooks, Linux - Implemented and trained system that transcribes English audio to text - Used transformer-based attention model Placed #14 of 300 students in the course (Intro to Deep Learning)
--	--

Awards & Scholarships

MISM Merit Scholarship (CMU) – 50% of tuition for all semesters	Fall 2019 – Fall 2020
Dean's List (Wash U) – Cumulative GPA of 3.5 or above	Fall 2018

Skills

Coding Languages: Python (3 years), Java (4 years), SQL (3 years), MATLAB (2 years), R (2 years), Spark (1 year)
Software/Libraries: PyTorch, TensorFlow, Amazon Web Services (AWS), Pandas, NumPy, SQL, Linux, Git, Microsoft Office
Languages: English (Native), Korean (Fluent), Chinese (Professional)
